## Mineral Wool Insulation + REI 120 = Fire Safety Compliance

Minimise thermal bridging, reducing condensation and mould formation, with **Egco**box® BBA approved thermal break connectors. For many years, **Egco**box® has consistently comprised non-combustible mineral wool insulation to REI 120 and conforms to the amended Building Regulations 7(2) for combustible products for England.

MAX FRANK reinforcement systems fulfil the **highest fire safety standards**, are fully supported by **advanced** and **user-friendly design software** and **onsite installation support** when required.

If you are working on a new scheme where fire safety compliance is key, contact our Technical Team for advice.

**Egco**box® – fire safety compliance ensured.

Another problem solved by **MAX FRANK**.
