

# Chapel Arches

Maidenhead, Berkshire

© TP Architects

**MAX FRANK supplied Shearail® punching shear reinforcement & Egccobox® thermal breaks to this mixed-use development.**

This 3-phase development comprises "The Picturehouse", "Chapel Wharf" & "Waterside Quarter".

The scheme is part of a large-scale redevelopment project & delivers apartments, homes, restaurants & amenities, plus the Waterways Restoration Project - which brings the Thames into town.

The project as a whole provides 182 stylish apartments, 259 new homes & 30,000 sq ft of commercial space.

MAX FRANK Shearail® punching shear reinforcement & Egccobox® thermal break connectors to REI 120 were installed on this project.
