**Italy's "MAXXI" National Museum for Arts of the 21st Century was designed by the architect Zaha Hadid. The museum was opened in Rome in 2010.**

This highly complex museum was built in Rome's Flaminio district. The National Museum of Arts of the 21st Century was designed by the architect Zaha Hadid.

Fibre-reinforced concrete distance tubes corresponding to DIN 1045 were used to guarantee the wall thickness of the exposed concrete walls. Sealing cones made of fibre-reinforced concrete were used to close the conical tie holes in the exposed-concrete surface.

**Type of building:**  
Museum building

**Architect:**  
Zaha Hadid, London

**Building contractor:**  
Geom. Gianni Scenna

**Distributor:**

**Completion:**  
2010
