

Torre Australis

Madrid

Abstellelement für Arbeitsfugen Stramaform®

© www.maxfrank.com

MAX FRANK Spain has supplied Stramaform® formwork elements for the construction joints of the foundation slab.

The [Torre Australis](http://torreaustralis.com/) building in Madrid will house 208 exclusive apartments distributed in one tower and two buildings. The main tower with 23 floors and a height of around 77 metres will be ready for occupancy in the next few years.

Torre Australis will be the architectural residential reference in the Spanish capital.
