

Liebherr logistics centre

Kirchdorf

© www.liebherr.com

Liebherr-Logistics GmbH is building a logistics centre and an administration building for the IT department in Kirchdorf.

Furthermore, an assembly hall will be added in the near future. The company Liebherr-Logistics GmbH was founded in 2011 within the Liebherr Group and is active in the fields of logistics, warehousing and distribution of spare parts.

The logistic center in Kirchdorf covers the supply of spare parts for earth moving machinery worldwide. Earth moving machinery is one of the eleven product lines offered by the Liebherr Group.

In addition to the good transport links due to the connection with a motorway A7, the possibility of further expansion given on the area was crucial for the choice of location. The new site is located very close to the Groups production sites in Southern Germany, Austria and France.

MAX FRANK supplied distance tubes, boxout-shutters and spacers for the construction of the logistics center.

Type of building:

Clients and Developers:

Liebherr LLG Kirchdorf
