In one of Kristianstad's finest locations, property No. 12 is under construction.

Just 'a stone's throw' from the central station and next to the new bus square, the residential building is in close proximity to shops in Galleria Boulevard, restaurants, cultural life and the Canal Park which boasts tranquil greenery and water areas.

The property houses a total of 76 apartments on its 12 floors - to be occupied during the Spring of 2021. No. 12 is a Nordic Eco-labelled building and meets the Nordic Ecolabel requirements for materials, construction process, use, waste and recycling phase.

MAX FRANK Egccobox® thermal break balcony connectors were accepted for use on the eco-project. Egccobox® prevents thermal bridges, reducing condensation and heat loss - ultimately providing warm floors and a pleasant indoor climate for the occupants.
