

Las Terrazas de Rivas

Madrid

Universal-Schalmaterial Pecafile®
© www.maxfrank.com

The permanent formwork Pecafile® was supplied by MAX FRANK Spain for the foundation of a housing complex with 93 units.

A total of 2,000 sqm of Pecafile® permanent formwork material was used.

- The formwork material was delivered to the construction site made to measure.
- The foundation was concreted in a single operation - this saves time and money.
- The Pecafile® formwork protects the foundation from environmental influences in the ground.

Type of building:

Clients and Developers:

PromoRed <http://www.promored.es/>

Architect:

Pérez - Guerra y Asociados

Building contractor:

Rubau <http://www.rubau.com/>

Completion:

2018
