

# Treatment Plant Waßmannsdorf

Schönefeld

Erweiterungsbau Klärwerk Waßmannsdorf  
© www.maxfrank.com

**The treatment plant Waßmannsdorf will be enlarged to catch the rising wastewater volume in the district Dahme-Spreewald. Two additional purification tanks and a mixing water storage will result.**

The formwork element Stremaform® was used for the construction project to implement the conical concrete structure easily and efficient.

**How to:** Formwork for funnel structures [> more](#)
