**In southern Staffanstorp, Vikhem, the project Vikhemsporten is under development. The project consists of five residential buildings with a total of 78 apartments.**

Located in excellent surroundings, in a small-town neighbourhood with countryside just around the corner, the development is close to services, communications and schools are within cycling distance. In addition to the apartments, a large underground garage and grounds are also being constructed.

The development offers modern and comfortable accommodation in a contemporary environment with the city in close proximity. The project is planned to be completed by the end of 2023.

MAX FRANK AB delivers Zemseal®, Fradiflex® and Pecafil®.
