**For the Clem Jones Tunnel project in Australia, MAX FRANK supplied fibre-reinforced concrete spacers as well as the Intec® injection hose system for joint seal.**

The CLEM7 project in Australia is one of the country's most important infrastructure projects. It is a continuous 6.8-kilometre multi-lane highway and a 4.8-kilometre tunnel constructed of state-of-the-art precast concrete tunnel segments.

MAX FRANK products have been used for major tunnelling projects worldwide for many years as they meeting the highest performance and quality requirements.
