For the construction of this high-rise residential building MAX FRANK Coupler threaded connection was delivered.

The “Terraced Tower” project is a residential high-rise building with a total living area of over 25,000 square metres and a height of 110 metres. All rooms in the apartments are connected to the terrace. Thus, the connection between the interior and exterior has been created along with a view over the city of Rotterdam.

In addition to products from the reinforcement technology sector, MAX FRANK also supplied products from the formwork and sealing technology sectors.
