

OLM - Nature Escape

Sand in Taufers

OLM - Nature Escape
© Gasser Markus GmbH

In the Tauferer Ahrntal valley, a unique hotel surrounded by breathtaking nature will be constructed by the end of 2023. "OLM is South Tyrolean and means the alpine pasture, the alpine meadow as well as the infinite always in the passing of time." (www.olm.it)

The hotel will invite its guests to discover new things and feel the simplicity and 'lightness'. This lightness is also reflected in the circular and filigree architecture.

MAX FRANK is proud to be part of this project in reinforced concrete construction and supplies Fradiflex® metal waterstop, Stremaform® stay-in-place formwork, Egcosono stair landing bearing support as well as fibre concrete spacers and fibre concrete distance tubes.

We wish all the best for the grand opening towards the end of 2023!

Type of building:

Clients and Developers:

Carron Bau www.carronbau.com/de

Building contractor:

Gasser Markus GmbH www.gsr.eu/de

Distributor:

Max Frank Italy GmbH

Completion:

2023
